

Complex interaction

Moving in the world frame: **the person**, **the seal**. Staying in place: 2 platforms.

The person moves about 6.4 m in the world frame at an average speed of 1.43 m/s; it accelerates over the clip; it reverses direction around frame 24; it moves away from the seal.

The seal moves about 3.5 m in the world frame at an average speed of 1.41 m/s; it reverses direction around frame 1; it moves away from the person.

Question

Right answer: D

In the world frame (ignoring camera motion), approximately how far (in meters) did **the seal** move between frame 1 and frame 27 of 34?

A. 0.58 B. 1.1 C. 0.78 **D. 1.4**

reference: 1.56 m
